

Copilot for Microsoft 365 Rapid Launch

[Get Started →](#)

\$6,700

SMBs (with less than 75 employees) who'd like to get to value quickly with a Copilot pilot launch of approx. 5 users

2 Weeks

Why Rapid Launch

The Copilot rapid launch focuses on getting to value quickly with AI, learning from the pilot program, and expanding to the other groups of users.

How It Works

STEP 1.

Identify a group of about **5 users** and the use case for the copilot pilot program from these three recommended groups: **sales, HR, or executive.**

STEP 2.

Define the **success criteria** and deliverables for the rapid launch. We recommend a 2-week and 2-month objective.

STEP 3.

Conduct a **security and governance review** to align with the selected use case and identify potential risks and policies.

STEP 4.

Deliver **two 1h training workshops** for the chosen group of users. The 1st workshop is introduction and demo. The 2nd workshop is for Q&A.

STEP 5.

Evaluate the results and feedback from the rapid launch and **decide on the next steps** for expanding or customizing copilot.

Engagement Deliverables

Two 1h trainings for a group of approx. 5 users
