AI in a Day

Functional AI Proof of Concept – Customized for You

Jumpstart your AI journey with a hands-on proof of concept. Identify your high-impact use case, build a custom AI prototype, and validate its effectiveness – **all in just 3 days**.

$3,000 investment from you + **$3,000 investment from us** for your business.

How It Works

Day 1: Brainstorm
Brainstorm and select a high-impact use case

>

Day 2: Build
Build the AI-powered proof of concept

>

Day 3: Test
Test drive the solution with your read data

What You'll Receive

❏ **Customized AI Solution**
Tailored to your documents, workflows and business goals

❏ **Performance Metrics**
Accuracy, extraction rates, and time savings - quantified

❏ **Test Results**
See your data in action with real-time validation results

❏ **Impact Analysis**
Joint impact analysis from full implementation to measure success

❏ **Implementation Roadmap**
Clear next steps for scaling the AI solution across your organization

AI in a Day
Use Cases & Why This Approach Works

Based on your business needs, we'll help you pick a use case and build a proof of concept.
Here are two examples to help you envision your proof of concept.

1. Identity Verification & Document Validation

- Validate ID's (driver's license, passports)
- Extract and confirm key fields
- Match selfies to ID photos
- Flag discrepancies for review

2. Intelligent Document Processing from Non-Standardized Sources

- Extract data from leases, contracts, forms
- Handle non-standard formats and scanned images
- Convert unstructured content into structured data
- Deliver outputs ready for system integration

Why This Works

Real results with your specific use case

Low risk with a shared investment

Data-driven decisions with **clear benchmarks**

Stakeholder buy-in through tangible outcomes
