

Alarm Guardian

We help customers monitor and improve their organization's security posture while preventing, detecting, analyzing, and responding to cybersecurity incidents around the clock

Problems our offer solves

Lack of visibility into security incidents

Difficulty in correlating event data from multiple sources

Hard to identify the extent of any known breaches

Lack of inhouse cybersecurity skills and shortage on internal cybersecurity staff

Inability to identify, assess, and mitigate security risks in a timely fashion

Our Solutions

Single pane of glass for incidents

Kill chain correlation

Visibility into devices and accounts involved in the breach

Security team filled with cybersecurity professionals (skills)

Timely response to cyber attacks before damage is done

Why ProServeIT's Alarm Guardian

Improve overall security posture

Historical reporting and analysis of attacks that are slow and steady

User Entity Behavior Analysis

Vast Threat Intelligence Network

Automated Playbooks to respond to attacks

Custom cyber security roadmap

Proactive Threat Hunting

Up to date on current threats
