

How to Start Building Copilot Agents

Your quick guide to turning tasks into smart teammates.

01

IDENTIFY

What's slowing you down?
Look for repetitive, time-consuming work.

02

CHOOSE

Pick the brain that fits.
Whether you need creativity, logic, or speed, there's a model for that.

03

BUILD

No coding required.
Use the visual builder to set goals, map logic, & connect data.

04

ITERATE

Start small, then refine.
Use feedback and performance data to tweak your agent.

05

THINK BIGGER

Go beyond chat.
Agents can trigger workflows, surface insights, & collaborate with other agents.
