Device Management Foundation
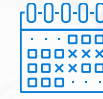

Simplified Device Management & Enhanced Data Security

$7,500+ USD / $10,000+ CAD

SMBs (maximum 300 employees)

2 weeks+

We will **set up Microsoft Intune** within your organization so that you can streamline your IT endpoint management, enhance security, and support flexible work environments, all while saving time and money.

Solve Your Top 5 Pain Points

1. Data Breach Risks

Protecting sensitive company information is a constant concern.

2. Employee Device Use

Securing personal devices used for work without invading privacy.

3. High IT Costs

Significant expenses in maintaining IT infrastructure.

4. Limited IT Resources

Manual and time-consuming administrative tasks.

5. Data Access Control

Controlling and monitoring access to sensitive data.

Top 5 Business Benefits

1. Expertise & Experience

Avoid common pitfalls and follow best practices.

2. Time Savings

Our experience will ensure an efficient rollout.

3. Risk Mitigation

Identify and mitigate risks to reduce security breaches and compliance issues.

4. Cost Efficiency

Achieve cost efficiency with a streamlined deployment.

5. Focus on Strategic Projects

Outsourcing the Intune rollout lets you focus on strategic projects that drive business growth.
