# Azure Migration

ProServeIT's Azure Migration Offer is to help you successfully migrate your applications and services to the Microsoft Azure Cloud. Our experienced Azure team will integrate your server room with Azure using VPN and move your first workloads to Azure. To fully understand your environment and optimize your IT infrastructure, ProServeIT recommends running an Azure Assessment prior to migrating to Azure.

## Benefits

| | | | | |
|---|---|---|---|---|
| Security is our foremost concern when migrating your workloads to Azure and managing your environment thereafter. | Migrating to Azure lowers your total cost of ownership (TCO). With Azure's flexible compute options, you pay as you go without a huge CapEx. | As your organization grows, you can easily scale your Azure environment. | A methodical, phased migration based on best practices & practical industry experience. | It allows for server decommission within your data center. |

## Azure Migration Features

| | | |
|---|---|---|
| Deploys Azure Core Services | A phased migration of systems to Azure | Includes VPN Networking integration and setup |

Includes 3 servers total with the following workloads: 1) Active Directory DC  2) DFS Replicated Node  3) Remote Desktop Services  4) Windows DNS Server
