

# Office 365 Security Assessment

Have you ever wondered if your organization would be able to bounce back from a data breach? How often does the topic of cybersecurity cross your mind? With the number of companies appearing in the news, and the prediction that these attacks are only going to get worse, every company should be thinking about how they can ensure a strong security posture and how to mitigate security risks.

## What is Security Assessment?

ProServeIT's Office 365 Security Assessment has been designed to ensure that you're adopting Office 365 security solutions within your organization to increase your security posture and reduce your risks.

We'll look at your current Office 365 environment, including all the products, features, and configurations that you currently have deployed, and assign a numerical Office 365 Secure Score based on how secure your Office 365 set-up is. Along with this score, we'll also give you some prescriptive recommendations to help you increase your security posture within Office 365 and reduce your risk of potential breaches.

## Deliverables & Activities

ProServeIT's Office 365 Security Assessment will include:

- [A Kick-off Presentation](#), overview of the engagement covering vision and objectives, requirements and next steps and actions.
- [A Pre-Assessment Questionnaire](#), a questionnaire containing questions on cloud usage/adoption, security requirements and objectives, regulations and frameworks.
- [A Recommendations and Roadmap Report](#), a presentation containing a prioritized list of Office 365 security recommendations based on Office 365 Secure Score.
